

GREEN MACHINE METERING BIN AND DRUM FEEDER SYSTEMS ARE RECOGNIZED AS THE MOST DURABLE, EFFICIENT, AND RELIABLE SYSTEMS IN THE INDUSTRY

Provides an Even Flow of Material To Your System

Our metering bin and drum feeder systems enhance pre-sort rates and screen performance in systems that process high tonnages.

Increase Throughput

Customers see a 30% increase in material throughput when our metering bins are installed at the beginning of their recycling systems.

High Capacity

The overall capacity of our metering bin systems range from 40 to 120 cubic yards, enough to meet your entire plant's processing requirements.

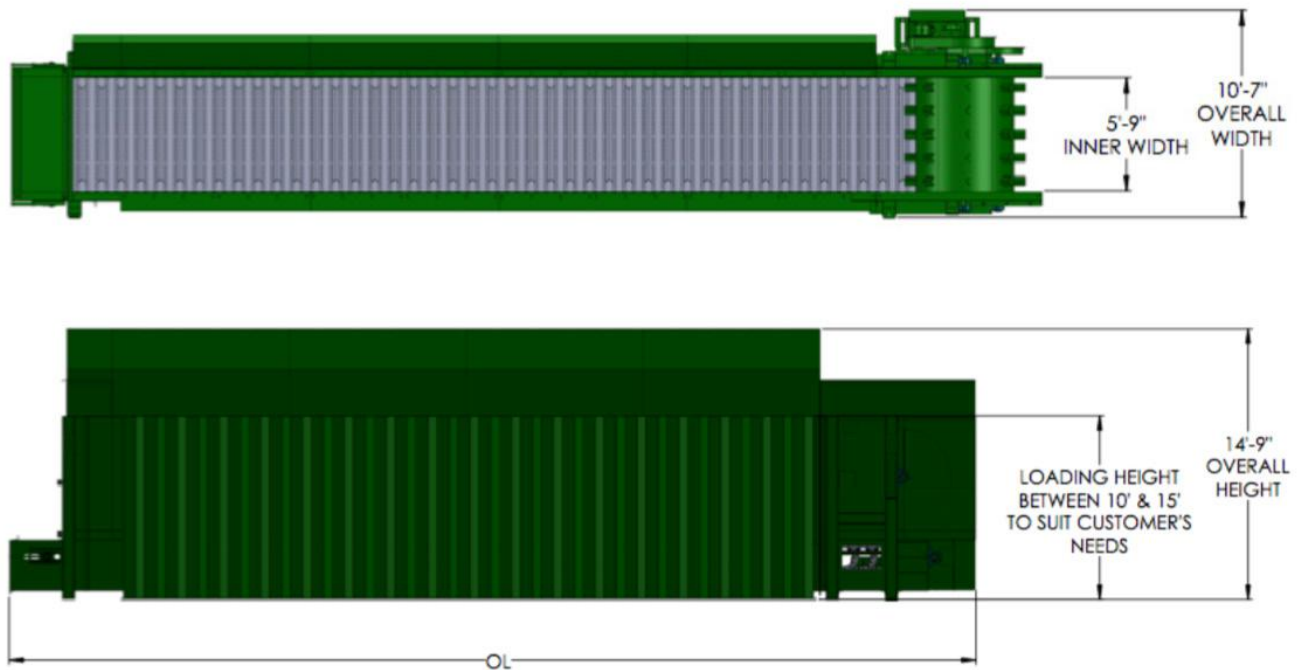

Optional Bag Opener System

Our bag opener system lies above the metering drum and rips open unopened bags releasing the material inside. This enhances screening performance and makes life easier for manual sort inspectors.

EQUIPMENT SALES & SERVICE OFFICE

Green Machine Sales, LLC
11 East Genesee Street
Baldwinsville, NY 13027
